

Product Description

Anglomoil Roadmaster 100 15W-40 is an excellent multipurpose petrol and diesel engine oil meeting the SJ and CF-4 performance specifications

Product Features & Benefits

Suitable for high speed, four-stroke cycle diesel engines. Roadmaster 100 provides excellent control of oil consumption and piston deposits. It is suitable for early model on-highway heavy duty trucks as well as gasoline and diesel powered light duty trucks and passenger cars when recommended by the manufacturer in the vehicles hand book.

Additional Information

Recognising the problems which some oils can cause in the wet clutch, JASO (Japan Automobile Standards Organisation) released in 1999 a new specification, which for the first time defined performance standards for Four Stroke Motorcycle Oils. This standard is entitled JASO T903 and contains three separate tests to measure the friction characteristics of engine oils. Oils which meet the highest friction requirements are classified as 'MA' and lower friction oils are 'MB'.

Roadmaster 100 15W-40 meets API CF-4, SJ and JASO MA performance standards, a combination which identifies it as a very useful, all round lubricant for older vehicles and a superior quality oil for motor cycle use.

Roadmaster 100 15W-40 meets or exceeds the requirements of all leading manufacturers of four stroke motor cycles, including Honda, Suzuki, Yamaha. European motorcycles which are generally fitted with dry clutches do not need high friction characteristics. Nevertheless Roadmaster 100 15W-40 is highly suitable for BMW, Ducatti etc.

Typical Characteristics

SG @20°C	0.878	Viscosity Index	140
Viscosity @ 40°C	105.0	TBN	6.0
Viscosity @100°C	14.4	Sulphated Ash %Wt	0.77
