

Anglomoil Uniplex Grease represents state of the art grease technology.

It is a high quality Calcium Sulphonate grease providing excellent performance over a wide range of operating temperatures and harsh environmental conditions.

The Calcium Sulphonate soap base possesses an exceptionally high drop point - over 300°C and the grease will give reliable operation up to temperatures of 150°C.

In addition to its unique high temperature properties Uniplex Grease contains an additive package giving extreme pressure performance, anti-rust, anti-oxidation and excellent resistance to water washout.

Recommendations

Anglomoil Uniplex Grease meets the specifications of leading bearing manufacturers and is the most suitable grease for roller and ball bearings under heavy load and/or high temperature.

Use in wheel bearings subject to high temperature and in ball joints.

Use in chassis lubrication subject to mild to severe duty and prolonged relubrication periods.

Use in industrial applications where high temperatures and heavy loads are encountered.

Highly resistant to water contamination.

Specifications

NLGI No. 1 & No. 2 grease
Melt Point over 300°C
Soap base - Calcium Sulphonate
Timken OK Load 27 Kg
Base oil viscosity 9.6cs @ 100°C
NLGI Rating GC and LB

Anglomoil Superior Lubricants

Lubricants for Automotive - Industry - Food - Farm Machinery - Marine - Earthmovers - Road Transport
