

# PRO 901EP Polymer Paste

## Product Description

**Anglomoil Pro 901 EP Polymer Paste** is a Full Synthetic Calcium Sulphonate based assembly/lubricating paste & anti seize blended with P.T.F.E (Polytetrafluoroethylene). Anglomoil Pro 901 EP Polymer Paste contains the very latest Enhanced Polymer Technology (E.P.T) providing very high performance characteristics such as exceptional Extreme Pressure (E.P) properties, high salt water resistance, and high operating temperatures with high residual lubrication and will not dry out.

**Anglomoil Pro 901 EP Polymer Paste** provides Exceptional Film strength and superior adhesion. The Long-term residual lubrication of Anglomoil 901 EP Polymer Paste ensure moving parts are provided with an almost permanent high load type film of lubricant able to tolerate high and low temperatures and moisture contamination.

## Applications

- Tool and Die assembly
- Injection mould tool lubricant
- Engine and Head Assembly
- Marine/fishing assembly and lubrication
- Small gear assemblies
- Linear rails as well as any application where moving parts require extreme protection and lubrication

Master Item# 1829

Pack Size Availability: 250g, 500g, 1Kg, 20Kg, 170Kg
