

Product Description

Contram CB-3 is a concentrated metalworking fluid system cleaners designed for use during the process of fluid disposal and re-charge. Contram CB-3 is a combination of effective bactericides and fungicides with a formaldehyde-free option, alkaline surfactants and surface-active agents that provide a complete package for cleaning disinfecting systems to avoid problematic microbial contamination in the new fluid charge.

Proper application of system cleaners will help to prevent the re-emergence of microbial contamination challenges in the new metalworking fluid dilution and will facilitate a cleaner, more productive workplace.

Product Features & Benefits

- Convenient package that cleans and disinfects metalworking fluid systems.
- Highly effective against both bacteria and fungi.
- Helps disperse other contaminants so that they are more easily removed in the cleaning process.
- Safe and effective when applied and handled properly.

Recommended Use Directions

Contram CB-3 products are recommended for addition to in-use metalworking fluid dilutions prior to fluid disposal.

Contram CB-3 should be added at 0.5-2.0% based on the total diluted fluid volume, depending on the extent of microbial and other contamination in the system.

Typical Properties

	Contram CB-3
Appearance	Clear, amber liquid
pH	9.8 (1%)
Formaldehyde Content	No
Active Biocide Chemistry	Benzisothiazolin / Iodocarbamate

Master Item# 2600021
 Pack Size Availability: 20L
